

GIS Inventory Forester

Interview Video Link: <https://youtu.be/ctcXSgn30Oc>

Job Title: GIS Inventory Forester with Giustina Resources

Job Description: "I am responsible for the geographic information system and timber inventory. I do the mapping on the computer for a tree farm. I know how many acres of timber and how old the trees are. I do timber cruising where we go out and do sample plots out in the woods measuring trees.

Ways to Volunteer, Intern, Learn More, Etc: OSU's forestry intern program.

Advice From the Professional: "Be very willing to learn and ask questions when you do not know what something is."

Average Salary: Approximately \$66,600. It is based on skill and experience. A head GIS Inventory forester at a very large timber company may make around \$90,000 or more. Then an entry level GIS Inventory position may pay around \$50,000 a year.
